

■ Crop Disease Detection Report

Crop	Apple
Detected Condition	Cedar Apple Rust
Confidence	100.0%
Status	Diseased
Severity	Medium

Description

Your Apple plant shows signs of Cedar Apple Rust.

Symptoms

Visible discolouration or lesions on leaves.

Causes

Fungal, bacterial, or viral infection.

Treatment

Consult a local agricultural extension officer for specific treatment.

Prevention

Rotate crops, remove infected debris, use disease-resistant varieties.

Recommendations

1. Remove and destroy infected plant parts
2. Apply appropriate fungicide/pesticide
3. Improve field drainage
4. Avoid overhead irrigation
5. Consult agricultural extension services
